

Dear Karan,

Greetings...

This was a wonderful job done, MIAL really appreciate the co-operation extended by Reliance Energy Street Light poles departments towards the work done in respect of shortening the street light poles from approach path of runway 09 on western express highway opposite Milan subway before the given time. This will provide us a safe and hazard free environment for aircraft movement through CSI Airport.

We hope that the same co-operation will be there in future also.

Thanks for all the support.
